PROFESSIONAL SUMMARY

Business Data Analyst with nearly 5 years in MIS, reporting and BI, including almost 4 years in InsurTech across Motor, Health, Term, Travel, Employee Benefits and an insurance operations ERP. Builds the SQL reporting layer (views, stored procedures, CTEs, window functions, JSON) and Power BI, Metabase and Excel dashboards that track policy sales, claims, endorsements, add-on performance and lead funnels. Experienced in root cause analysis, REST API validation, ETL and data migration, and production support. Built an end-to-end Microsoft Fabric analytics project using medallion architecture, PySpark, Delta tables, Direct Lake and DAX.

TECHNICAL SKILLS

SQL & Databases: MySQL, PostgreSQL, MongoDB; Complex Queries, Joins, Subqueries, CTEs, Window Functions, Views, Stored Procedures, JSON Functions, Query Optimization

BI & Visualization: Power BI (DAX, Power Query, Data Modeling, Drill-through, KPIs), Metabase, Google Looker Studio, Zoho Analytics, Tableau

Microsoft Fabric: OneLake, Lakehouse, Warehouse, Fabric Pipelines, PySpark Notebooks, Delta Tables, SQL Analytics Endpoint, Semantic Models, Direct Lake, Star Schema, Medallion Architecture

ETL & Integration: ETL, Data Migration, Data Transformation, Data Validation, REST API Integration, JSON Processing, Google Sheets Integration, Power Automate

Python & Automation: Python (Pandas, NumPy), Jupyter Notebook, Exploratory Data Analysis (EDA), Data Cleaning, n8n Workflow Automation

Analysis & Reporting: Advanced Excel (Power Query, Power Pivot, Pivot Tables, VLOOKUP/XLOOKUP, Macros), MIS and KPI Reporting, Root Cause Analysis (RCA), Funnel Analysis

Cloud & Platforms: AWS S3, Azure Blob Storage, Snowflake (Basic), Amazon Redshift (Basic)

AI-Assisted Work: ChatGPT, Claude, Gemini, Prompt Engineering, SQL Debugging, MCP

PROFESSIONAL EXPERIENCE

Data Architect / Business Data Analyst, *Evervent Pvt Ltd* 12/2022 – 08/2026 | SAS Nagar, Mohali

- Primary owner of **data architecture, reporting, database analysis, ETL and production support** across insurance platforms: **Motor, Health, Term, Travel, InsureOps ERP and Employee Benefits**.
- Built multiple **reports and dashboards** for business, call center and insurer teams: **claims and endorsements (Jio Insurance), policy sales, best-insurer policy sale KPIs, add-on performance** (identifying top-selling add-ons), **website visitors, leads, and lead drop-off analysis** across the customer journey on the portal.
- Developed **SQL Views and Stored Procedures** using **CTEs, Window Functions and JSON transformations** to power these reports and operational analytics.
- Re-architected ERP reporting by replacing application-level report generation (Node.js + Prisma) with **optimized MySQL Views consolidating 10+ database tables**, reducing server load and eliminating frequent application restarts.
- Enabled **one-click ERP report generation** for Business and Call Center teams, removing manual data consolidation; built stored procedures with JSON processing for **health insurance reporting and dynamic CSV generation**.
- Mapped **vehicle makes, models and variants to insurer-specific codes across 9 insurers** (Digit, Royal Sundaram, Bajaj, HDFC, ICICI, Tata, ACKO, National, Reliance), preserving manufacturer and fuel compatibility.
- Performed **Root Cause Analysis (RCA)** on production incidents (quote generation failures, proposal issues, premium mismatches, payment gateway failures, API integration defects) using application logs, SQL data and business workflows.
- Analyzed, integrated and validated **REST APIs** for quote generation, proposal processing, payment validation, policy issuance, customer validation, vehicle lookup and third-party insurer integrations.
- Designed, executed and validated **data migration and ETL processes** across applications and insurer systems; worked with product, development, QA, business and insurer teams on production fixes within SLA/TAT.

Data Management Executive, *M Style Sofas & Interior* 12/2021 – 11/2022 | Rajpura, Punjab

- Collected, validated and analyzed production and financial datasets to support business reporting and management decisions.
- Built MIS reports and interactive Excel dashboards using Power Query, Pivot Tables and charts, reducing manual reporting effort.
- Improved reporting accuracy and efficiency through data validation and process standardization.

Data Operations (Team Lead), *Aerial Telecom Solution Pvt Ltd* 12/2018 – 11/2021 | SAS Nagar, Mohali

- Led KYC data operations, ensuring SLA compliance, process accuracy and timely delivery.
- Managed team workload, client coordination and daily operational and KPI reporting.

PROJECTS

Microsoft Fabric Sales Analytics: End-to-End Data Engineering Project GitHub
Tech Stack: Microsoft Fabric, OneLake, Lakehouse, Fabric Pipelines, PySpark, Delta Tables, Warehouse, Direct Lake, Power BI, DAX, SQL

- Built a **Medallion Architecture (Bronze, Silver, Gold)** solution with Fabric Pipelines for ingestion and **PySpark** for cleansing and deduplication, stored as **Delta Tables** in a Lakehouse.
- Designed a **Star Schema** (fact and dimension tables) in a Fabric Warehouse and published a **Direct Lake semantic model**; validated results with SQL before reporting.
- Developed an interactive **Power BI dashboard** with **DAX measures** for Revenue, Orders, Customers, YoY Growth and Ranking; documented notebooks, SQL scripts and pipelines on GitHub.

Employee Benefits Claims & Endorsement Analytics Portal
Tech Stack: Metabase, MongoDB, Data Visualization, Embedded Analytics

- Designed interactive **Claims** and **Endorsement** dashboards in **Metabase**, querying MongoDB data for HR teams to monitor claims, endorsements, policy activity and operational KPIs.
- Worked with the development team to embed dashboards in the portal with authenticated real-time access; gathered reporting requirements from product and development teams.

Retail Sales & Customer Analytics Dashboard (Zepto Dataset, Kaggle)
Tech Stack: Power BI, DAX, Power Query, Data Modeling, Data Cleaning

- Built Customer Analytics, Sales Analytics, Order Analytics and Executive KPI dashboards with **Power Query** cleaning, modeled relationships, **DAX** measures, slicers and drill-through.
- Analyzed customer behavior, top-performing products and revenue trends to support marketing and sales decisions.

Looker Studio Sales Dashboard
Tech Stack: Google Looker Studio, Data Visualization, Dashboard Design

- Built an interactive **Looker Studio** dashboard analyzing sales, profit, customers, orders, product performance and regional trends, with filters and drill-down views for each area.

CERTIFICATIONS

- Microsoft Power BI – Simplilearn
- SQL (Advanced) – HackerRank
- SQL Assessment – TestDome
