

Rohit Chouhan

Data Analyst | Power BI | Microsoft Fabric | SQL | ETL | API Analytics | Workflow AI Automation (n8n)

✉ rck6977@gmail.com 📞 7355987689 📍 Rajpura, 140401 🌐 [rohitchouhananalyst](#) 🔗 [github.com/RohitChouhanAnalyst](#)

Business Data Analyst with 4+ years of experience in SQL, Power BI, ETL, and business analytics within the InsurTech domain. Skilled in designing complex SQL queries, enterprise reporting Views, Stored Procedures, and data transformation solutions to support business operations and decision-making. Experienced in Root Cause Analysis (RCA), API analysis, production support, and reporting automation across multiple insurance platforms. Currently expanding expertise in Microsoft Fabric, including Warehouse, OneLake, Semantic Models, and modern data warehousing, to build scalable analytics solutions.

SKILLS

TECHNICAL SKILLS

- **Advanced SQL:** MySQL, PostgreSQL, Complex SQL Queries, Joins, Subqueries, CTEs, Window Functions, Views, Stored Procedures, JSON Functions, Query Optimization
- **Microsoft Fabric:** OneLake, Warehouse, Lakehouse, SQL Analytics Endpoint, Semantic Models, Direct Lake, Data Modeling, Star & Snowflake Schema, Fact & Dimension Modeling
 - **Business Intelligence & Reporting:** Power BI, Metabase, Google Looker Studio, Zoho Analytics, Tableau
- **Programming:** Python (Pandas, NumPy), Jupyter Notebook, Data Analysis, Data Cleaning, Exploratory Data Analysis (EDA)
- **ETL & Integration:** ETL, Data Transformation, Data Validation, REST API Integration, JSON Processing, Google Sheets Integration, Power Automate
- **Data Analysis & Reporting:** Advanced Excel (Power Query, Power Pivot, Pivot Tables, VLOOKUP/XLOOKUP, Macros), KPI Reporting, Root Cause Analysis (RCA), Google Sheets
- **Cloud & Data Platforms:** AWS S3, Azure Blob Storage, Snowflake (Basic), Amazon Redshift (Basic)
- **AI & Productivity:** ChatGPT, Claude, Gemini, Prompt Engineering, AI-assisted Development, SQL Debugging, Workflow Automation (n8n), MCP

PROFESSIONAL EXPERIENCE

Data Architect / Business Data Analyst, Evervent Pvt Ltd 12/2022 – Present | SAS Nagar, Mohali

- Served as the primary owner for **data architecture, reporting, database analysis, production support, ETL, and business intelligence solutions** across multiple insurance platforms.
- Designed and optimized scalable data solutions by developing **complex SQL queries, enterprise reporting Views, Stored Procedures, CTEs, Window Functions, and JSON-based data transformations** to support business reporting and operational analytics.
- Architected enterprise reporting solutions by integrating data from ERP, CRM, insurer APIs, and operational databases into unified reporting datasets, significantly reducing manual reporting efforts.
- Led end-to-end database management activities including data validation, query optimization, production data verification, reporting dataset design, and backend data analysis.
- Designed, executed, and validated data migration and **ETL processes**, ensuring accurate extraction, transformation, validation, and movement of business data across multiple applications and insurer systems.
- Performed **Root Cause Analysis (RCA)** for production incidents, quote generation failures, proposal issues, premium mismatches, payment gateway failures, and API integration defects by analyzing application logs, SQL data, and business workflows.
- Collaborated with product, development, QA, business, and insurer teams to design data solutions, implement production fixes, and improve overall business processes.
- Developed reporting automation using **Power BI, SQL Views, Stored Procedures, and Excel-based reporting**, enabling business teams to generate operational and management reports with minimal manual effort.
- Analyzed, integrated, and validated REST APIs for quote generation, proposal processing, payment validation, policy issuance, customer validation, vehicle lookup, and third-party insurer integrations
- Managed production support, incident analysis, SLA/TAT compliance, stakeholder communication, and technical issue resolution, ensuring high system availability and business continuity.

Data Management Executive, M Style Sofas & Interior 12/2021 – 11/2022 | Rajpura, Punjab

- Collected, validated, and analyzed production and financial datasets to support business reporting, operational analysis, and management decision-making.
- Developed MIS reports, interactive dashboards, and automated reporting solutions using Advanced Excel (Power Query, Pivot Tables, Charts), reducing manual reporting effort and improving management decision-making.
- Improved reporting accuracy and operational efficiency through data validation, reporting automation, and process standardization.

Data Operations (Team Lead), Aerial Telecom Solution Pvt Ltd 12/2018 – 11/2021 | SAS Nagar, Mohali

- Led KYC data operations while ensuring SLA compliance, process accuracy, and timely delivery.
- Supervised team performance, workload allocation, client coordination, and daily operational reporting.
- Standardized operational processes and reporting practices to improve productivity and turnaround time.
- Monitored operational KPIs, resolved escalations, and ensured adherence to quality standards.

PROJECTS

Microsoft Fabric Sales Analytics | End-to-End Data Engineering Project [↗](#)

Tech Stack: Microsoft Fabric, OneLake, Lakehouse, Fabric Pipelines, PySpark, SQL, Delta Tables, Warehouse, Direct Lake, Power BI, DAX, GitHub

- Designed and implemented an end-to-end Sales Analytics solution using Microsoft Fabric following the **Medallion Architecture (Bronze, Silver, Gold)**.
- Built **Lakehouse, Fabric Pipelines, PySpark Notebooks, Fabric Warehouse, and Direct Lake Semantic Model** for data processing and analytics.
- Performed data ingestion, cleansing, deduplication, and transformation using **PySpark** and stored processed data as **Delta Tables**.
- Designed a **Star Schema** with Fact and Dimension tables to improve reporting performance and data organization.
- Developed an interactive **Power BI dashboard** with advanced **DAX measures** for Revenue, Orders, Customers, YoY Growth, Ranking, and business insights.
- Used **SQL** for warehouse validation and analytical queries before publishing reports.
- Documented the complete project workflow and maintained the project on **GitHub** with notebooks, SQL scripts, pipelines, architecture, and documentation.

Retail Sales & Customer Analytics Dashboard (Zepto Dataset)

Tech Stack: Power BI, DAX, Power Query, Data Modeling, Data Cleaning, Business Intelligence

- Designed an end-to-end interactive Power BI solution comprising **Customer Analytics, Sales Analytics, Order Analytics, and Executive KPI Dashboards** using a retail dataset from Kaggle.
- Developed interactive dashboards with drill-down analysis for Customer Analytics, Sales Performance, Order Analysis, Revenue Trends, and Marketing Insights.
- Performed data cleaning, transformation, and modeling using **Power Query** and implemented relationships to support efficient reporting.
- Developed interactive KPIs, slicers, drill-through, and trend analysis to identify customer behavior, top-performing products, revenue growth, and sales opportunities.
- Generated actionable business insights to support **marketing strategy, customer retention, sales optimization, and executive decision-making**.

Enterprise Insurance Reporting, Analytics & Performance Optimization System

Tech Stack: MySQL, Advanced SQL, SQL Views, Stored Procedures, CTEs, Window Functions, JSON Functions, Query Optimization

- Re-architected the ERP reporting solution by replacing application-level report generation (Node.js + Prisma) with optimized SQL Views for improved performance and scalability.
- Designed enterprise SQL Views by consolidating **10+ database tables** into a unified reporting dataset covering customer, vehicle, quote, proposal, premium, payment, insurer, and policy information.
- Developed SQL Stored Procedures to automate health insurance reporting and dynamic CSV generation using JSON processing and business rules.
- Reduced server load and eliminated frequent application restarts by shifting complex reporting logic from the application layer to the database layer.
- Enabled one-click ERP report generation for Business and Call Center teams, **eliminating manual data consolidation and improving operational reporting efficiency**.

Employee Benefits Claims & Endorsement Analytics Portal

Tech Stack: Metabase, MongoDB, Data Visualization, Dashboard Development, Embedded Analytics

- Designed and developed interactive **Claims** and **Endorsement** dashboards using **Metabase** for an Employee Benefits Portal.
- Queried and analyzed operational data from **MongoDB** to build business reports and performance dashboards.
- Collaborated with the development team to integrate Metabase dashboards into the Employee Benefits Portal, enabling authenticated users to access real-time analytics.
- Developed dashboards that enabled HR teams to monitor claims, endorsements, policy activities, and operational KPIs through a centralized analytics portal.
- Collaborated with product and development teams to gather reporting requirements and deliver business-friendly analytics solutions.
